Summary

M.S. candidate in Computer Science and Engineering at Korea University (Advisor: Heuiseok Lim), with research and engineering experience across multiple AI domains. Passionate about advancing AI and unafraid to explore new ideas, I have worked with diverse modalities and problems, including:

- Representation Learning
- Knowledge Editing
- Information Extraction
- Retrieval-Augmented Generation (RAG)
- Uncertainty Estimation
- Automatic Speech Recognition (ASR)

International Publications

† (Corresponding author)

Enhancing Automatic Term Extraction with Large Language Models via Syntactic Retrieval

YONGCHAN CHUN, MINHYUK KIM, DONGJUN KIM, † CHANJUN PARK, † HEUISEOK LIM

ACL 2025 - Findings of the Annual Meeting of the Association for Computational Linguistics

Benchmark Profiling: Mechanistic Diagnosis of LLM Benchmarks

DONGJUN KIM, GYUHO SHIM, YONGCHAN CHUN, MINHYUK KIM, † CHANJUN PARK, † HEUISEOK LIM

EMNLP 2025 - Proceedings of the Conference on Empirical Methods in Natural Language Processing

KoLEG: On-the-Fly Korean Legal Knowledge Editing with Continuous Retrieval

JAEHYUNG SEO, DAHYUN JUNG, YONGCHAN CHUN, JAEWOOK LEE, DONGJUN KIM, HWIJUNG RYU, DONGHOON SHIN, † HEUISEOK LIM

EMNLP 2025 - Findings of the Conference on Empirical Methods in Natural Language Processing

Domestic Publications

KONVERSE: An End-to-End Model for Translating English Speech to Korean Text

YONGCHAN CHUN, MINHYUK KIM, DONGJUN KIM, † CHANJUN PARK, † HEUISEOK LIM

HCLT 2024 - Annual Conference on Human and Language Technology (Oral)

UKoSpeech: A Universal Korean ASR System for Diverse Domains

YONGCHAN CHUN, MINHYUK KIM, DONGJUN KIM, † CHANJUN PARK, † HEUISEOK LIM

HCLT 2025 - Annual Conference on Human and Language Technology (Oral)

Honors & Awards

2023 **Exellence Award**, Capstone Project

University of Seoul

2024 **Silver Prize**, AI x Bookathon Hackathon

Sungkyunkwan

2024 **Exellence Award**, Software Maestro

University

Seoul, S.Korea

Experience

- (National Initiative) National Representative AI — World Best LLM

RESEARCH ENGINEER

- Participated in Korea's National Representative AI initiative (supported by NIPA, IITP, and NIA).
 - The project involves working on servers equipped with approximately 1,000 NVIDIA H100 GPUs.
 - Led data preprocessing and developed the LLM evaluation framework.

NC AI, Korea University, ETRI, KAIST,
SNU, LOTTE Innovate, POSCO DX

Aug. 2025 – Dec. 2025
- (Independent Research) Dataset Filtering for Domain Adaptation of ASR Models

RESEARCH ENGINEER

- Conducting research on improving preprocessing techniques for domain-specific ASR datasets.
 - Propose a novel metric for dataset filtering that excludes term-level dependencies when computing WER or CER.
 - Manuscript to be submitted to **Interspeech 2026** as first author.

Korea University

Sep 2025 – Feb 2026
- (Independent Research) Uncertainty Estimation of Pretrained Models

RESEARCH ENGINEER

- Investigating the reliability and uncertainty estimation of large pretrained models.
 - Treated large pretrained models (including LLMs) as classifiers and used evidential deep learning for second-order uncertainty estimation.
 - Propose a Variational Autoencoder (VAE) to provide a pretrained model with improved uncertainty estimates in Bayesian manner.
 - Under review at **CVPR 2026** as first author.

Korea University

May 2025 – Nov 2025
- (Industry–Academic Joint Project) Unlearning for LLM Reliability

RESEARCH ENGINEER

- Developed RAG-based editing with lifelong learning for the legal domain.
 - Trained a BGE-M3–based retriever using a novel hard-negative mining strategy.
 - Published at **EMNLP Findings 2025**

KT & Korea University

Apr. 2024 – May 2025
- (Collaborative Research) Ramp lesion detection using an end-to-end deep learning framework

RESEARCH ENGINEER

- Developed an end-to-end model to detect whether a patient has a ramp lesion using image and tabular data.
 - Proposed a three-stage representation-learning pipeline to fuse image and tabular features effectively.
 - Improved prior SOTA by approximately 20%.
 - To be submitted to *The American Journal of Sports Medicine* as first author.

ChungAng University Hospital &
Korea University

May 2024 – Nov. 2025
- (Collaborative Research) MAGIC: Multi-Lingual Automated YouTube Subtitle Generation and Interpretation Companion

RESEARCH ENGINEER

- Developed an automatic speech recognition (ASR) inference pipeline.
 - Achieved an approximately 2.5×transcription speedup by combining WhisperX batch inference with the Groq API.
 - Deployed at magic.kullm.ai.

Human-Inspired AI Research Center
& Korea University

May 2024 – Nov. 2024
- (National-Funded Project) AI-based personal note-taking assistant

RESEARCH ENGINEER

- Built an AI-based personal note-taking service.
 - Developed a data-curation pipeline to collect training data for ASR domain adaptation.
 - Deployed the ASR model on-premises using Kubernetes and Ray.
 - Implemented RAG-based summarization and question answering.

Software Maestro

Mar. 2023 – Dec. 2023
- (Industry–Academic Joint Project) Fake hospital receipt detection

RESEARCH ENGINEER

- Built a binary classifier to detect fake hospital receipts.
 - Used a GAN-based representation model to encode receipt images and trained a classifier on top.
 - Constructed a hard negative mining dataset for fine-grained, robust classification.

Samsung SDS & University of Seoul

Aug. 2022 – Mar. 2023

Skills

Programming	Python
Machine Learning & Deep Learning	Uncertainty Estimation, Representation Learning
Natural Language Processing	Information Extraction, RAG, Knowledge Editing
Speech	Automatic Speech Recognition
Model Serving	Kubernetes, Ray
Language Skills	Korean, English

Education

Korea University

M.S. IN COMPUTER SCIENCE AND ENGINEERING

- Advisor: Heuseok Lim
- Natural Language Processing & Artificial Intelligence Lab
- **Thesis: Trustworthy AI in the Era of LLMs**

Seoul, S.Korea

Mar. 2024 - Feb. 2026

University of Seoul

B.S. IN GEOINFORMATICS

- Advisor: Youngmin Roh
- Interned at Machine Intelligence Lab (Aug.2022 - Aug.2023)
- TA of Data Mining (Spring 2023)

Seoul, S.Korea

Mar. 2017 - Aug. 2023

Extracurricular Activity

TAVE (Data Science & AI Club)

MANAGER

- Organized technical events and member sessions to strengthen networking among core members.
- Competed in multiple data-analysis challenges and hackathons.

Seoul, S.Korea

Mar. 2021 - Dec. 2022

Software Maestro (National software entrepreneurship training program)

MEMBER

- Built an AI-based note-taking assistant as part of a 3-person team.
- Ranked in the **top 6% (finalist)**, which was awarded a CES visit and a two-week course at CMU.
- Transferred the technology to a software solutions company.

Seoul, S.Korea

Mar. 2023 - Dec. 2023
